## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-9, 13, 14, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang (US Patent 6,224,000).

Wang '000 shows a spray device comprising:

- a housing including a chamber formed therein and including an inlet for coupling to a water reservoir and to receive water therefrom and including a front opening 31 formed therein for outward flowing of the water;
- a rotary member 50 rotatably received in the housing, the rotary member including a plurality of cavities formed therein, and including an outer peripheral portion having a plurality of outlets 55 formed therein and communicating with the cavities respectively and to be selectively aligned with the front opening of the housing to allow the water to selectively flow out through the front opening of the housing via either of the outlets of the rotary member and the housing including a mouth 42 communicating with the inlet for receiving the water from the inlet, the mouth being provided to selectively align with either of the cavities of the rotary member to allow the water to selectively flow out through either of the outlets of the rotary member. The

housing also includes a partition 40 provided in the chamber as recited in claim 3.

***Allowable Subject Matter***

3. Claims 5, 10-12, 15, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Christopher and Wang (US Patent 5,772,121) are pertinent to Applicant's invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904. The examiner can normally be reached on 8:00-4:30.
